- * Receptacles on endbell
- * Automatic voltage regulator (AVR)
- * 3 gallon plastic fuel tank
- * Portability Kit

ENDBELL

A & B. 120 V, 15 Ampere Duplex Receptacle

This duplex is split so that 15 amps of current may be drawn from each half of the receptacle. However, total power drawn must be kept within nameplate ratings.

C. Circuit Breakers

The receptacles are protected by an AC circuit breaker. If the generator is overloaded or an external short circuit occurs, the circuit breaker will trip. If this occurs, disconnect all electrical loads and try to determine the cause of the problem before attempting to use the generator again. If overloading causes the circuit breaker to trip, reduce the load. **NOTE: Continuous tripping of the circuit breaker may cause damage to generator or equipment.** The circuit breaker may be reset by pushing the button of the breaker.
