DESCRIPTION

A critical part of maintaining your generator is making sure there is enough fuel to get you through unexpected power outages when utility power is lost. Generac now offers a wireless LP Fuel Level Monitor* to measure the amount of LP fuel remaining in your tank. The Tank Utility app alerts the user for both remaining LP fuel level and usage reports, offering the ultimate peace of mind.

*This system is compatible with air-cooled and liquid-cooled models that utilize LP as a fuel source. The Tank Utility application is available for iOS and Android available on the iTunes store or Google play store.

FEATURES

- Simple, user friendly installation in less than 10 minutes
- Compact, sleek design
- Magnetic back for direct LP tank mounting
- Use with any iOS and Android smart device for connectivity
- Trending capability and historical usage info
- Status indicator lights
- Real time alerts for low LP fuel level monitoring
- Usage reports to monitor LP fuel usage per month
- Rated for harsh outdoor environments from 140°F (60°C) to -40°F (-40°C)
- Field-replaceable batteries with more than 3 years of battery life
- Compatible with 2.4Ghz 802.11b/g/n Wi-Fi utilizing WPA or WPA2 security
